Dear Prof./Dr. Bibhuti Das,

Horizon Europe EIC Pathfinder Challenges aim to build on new, cutting-edge directions in science and technology to create novel innovative solutions grounded in high-risk/high-gain research and development.

In the framework of the [EIC Pathfinder Challenges 2026](#) call, we would like to inquire your interest and availability to support us at the **European** Innovation Council (EIC) as an Individual Evaluator for the Challenge **"Advanced Materials for Miniaturised Energy Harvesting Systems"** under the responsibility of Programme Manager Paolo BONDAVALLI.

We are creating a preliminary list of experts in the corresponding scientific field, to act as evaluators, and because of your contribution to the field, we are confident that your participation in the evaluation would be extremely valuable.
