Smart Technologies for Sustainable Development

Select Proceedings of SMTS 2019

Series: Lecture Notes in Civil Engineering

- **Comprises select papers from the International Conference on Smart Materials and Techniques for Sustainable Development (SMTS) 2019**
- **Focuses on the emerging applications of smart materials and composites**
- **Offers latest results on technological advances towards sustainable development**

This book presents select papers from the International Conference on Smart Materials and Techniques for Sustainable Development (SMTS) 2019. The contents focus on a wide range of methods and techniques related to sustainable development fields like smart structures and materials, innovation in water resource development, optical fiber communication, green construction materials, optimization and innovation in structural design, structural dynamics and earthquake engineering, structural health monitoring, nanomaterials, nanotechnology and sensors, smart biomaterials and medical devices, materials for energy conversion and storage devices, and IoT in sustainable development. This book aims to provide up-to-date and authoritative knowledge from both industrial and academic worlds, sharing best practice in the field of smart materials analysis. The contents of this book will be beneficial to students, researchers, and professionals working in the field of smart materials and sustainable development.
